

You can earn money by visiting website through a specific network. This network is called PTC network. In the PTC business the easiest way to earn money is to get referrals (referrals=people who register thru u and cause u to earn a percentage of their income). Below is the list of PTC sites I frequent. After u register go to the surf/surf ads/browse links page and start clicking links. Some sites may also give offers which pay about 0.1-15 dollars. But these offers may need a lot of effort or some investment so lets leave it for later and concentrate on clicking links. When u click an ad, wait for 30 seconds and after u get a tick/DONE+tick/slashed \$ sign, click on another ad. REMEMBER before completing 1 ad, don't click on another!
